Akhil **Shelly**

Senior Software Engineer

Toronto, Ontario, Canada

akhil.shelly@gmail.com | www.akhilshelly.com | akhilshelly | akhilshelly

Professional Summary

Strategic and hands-on software engineer with a proven track record of leading high-impact cloud and microservices projects across industries. Seeking a challenging role where I can apply my expertise in technical leadership and agile delivery to deliver complex initiatives, mentor high-performing teams, and architect scalable, maintainable solutions. Passionate about solving difficult problems, fostering inclusive engineering cultures, and building systems that last.

Skills

Architecture & Cloud Computing	Solution Architecture, Microsoft/Amazon/Google Cloud, Cloud migrations
Software Development & Engineering	Backend Development – Java, Spring Boot, Python, TypeScript; Frontend & Testing
DevOps & Deployment	CI/CD Pipelines, Version Control & Collaboration Tools
Leadership & Team Management	Leading development teams, onboarding, training, and fostering growth.
Problem-Solving & Research	Technical troubleshooting, solution evaluation
Data Engineering	Data Migration, Data Pipelines, Big Data Technologies
AI	Utilizing AI tools to enhance software development and team productivity

Professional Experience

Avanade

Toronto, ON, Canada

2019 - Present

Manager — *June 2023 - Present*

- Oversee delivery across multiple workstreams, managing stakeholder expectations and mitigating risks to ensure timely releases.
- Drive internal initiatives for knowledge sharing, establishing best practices for Java and microservices development across the organization.
- Enhance recruitment efforts, advocating for standardized interviewing processes to reduce bias and ensure candidate quality.
- Foster a culture of technical excellence and professional growth, managing performance and career development for developers.

Senior Consultant — *Jan 2021 - June 2023*

- Led cross-functional teams through the full SDLC, from requirements gathering to deployment, ensuring seamless integration of microservices.
- Specialized in stabilizing high-risk or delayed projects, resolving complex technical bottlenecks and restoring stakeholder confidence.
- Designed scalable microservice architectures and defined migration roadmaps for moving on-prem legacy systems to the cloud.
- Acted as a technical anchor, onboarding new developers and conducting code reviews to maintain code quality standards.

Consultant — *Jan 2019 - Jan 2021*

- Engineered robust backend solutions for industry-leading clients, utilizing Java/Spring Boot and implementing JMS messaging patterns.
- Championed automated testing adoption, writing comprehensive test suites using Cucumber and TypeScript to ensure regression-free releases.
- Maintained CI/CD pipelines ensuring reliable build and deployment processes.

PolicyMedical

Richmond Hill, ON, Canada

Software Engineer — *2016 - 2019*

- Engineered a Policy & Contracts management system using Grails and AWS (EC2, S3, RDS), enabling collaborative authoring and compliance reporting.
- Partnered with Client Success to translate user feedback into actionable backlog items and live patches, improving customer satisfaction and resolution times.
- Collaborated with remote contractors and client IT teams to facilitate parallel development and single sign-on (SSO) implementations.
- Researched and proposed architectural solutions for new features, balancing cost, maintainability, and complexity.
- Led onboarding, training, and mentorship for new hires.

Evertz Microsystems, Ltd.

Burlington, ON, Canada

Design Engineer

2009 - 2016

- Worked in cross-functional teams to elicit requirements, gather feedback on features, and implement requests to the satisfaction of clients.
- Assisted with spinning up an offshore team in India. Successfully trained the offshore lead and participated in management activities.
- Responsible for onboarding, training and mentoring new hires.

Key Projects

Senior Software Engineer, Technical Advisor

Global Logistics Leader

Global Clearance Modernization *(Java (J2EE), Spring Boot, Claude Code)*

Jan 2026 - Present

- Spearheading a strategic **AI Proof of Concept** using **Claude Code** to reverse-engineer undocumented legacy Java (J2EE) logic into clear business process documentation.
- Accelerating knowledge transfer between Product and Technical SMEs by **automating the extraction of system behavior**, reducing discovery time for the modernization phase.
- Defining the **forward-engineering roadmap** by validating technical feasibility and identifying architectural dependencies within the existing monolith.

Technical Lead, Solution Architect

Global Premium Financial Services

Data Migration System *(Java, Spring Boot, Google Cloud, Redis, Apache Beam/Spark/Airflow, Python, GitHub Copilot/Actions, Jenkins)*

May 2024 - Nov 2025

- **Led several major technical initiatives** including parallelization of operations, data pipeline enhancements, and the successful migration of a critical third-party tool.
- Responsible for planning, design, implementation, operation, and delivery of a **net-new set of microservices** to facilitate validation of data privacy compliance.
- Utilized **Java/Spring Boot** to implement microservices and **Jenkins** to build and deploy them.
- **Fostered a high-performance culture** by actively mentoring team members and resolving blockers to ensure continuous delivery.

Technical Lead, Solution Architect

Managed Content Services Provider for Large US Banks

Content Management System *(Java, Spring Boot, Azure Cloud, Redis)*

May 2023 - May 2024

- Collaborated with client stakeholders to gather requirements and **define the architecture** for a content management system.
- Oversaw two development teams in the planning, design, and implementation of a **microservices suite**.
- Developed scalable microservices using **Java/Spring Boot** and orchestrated deployments via **Azure DevOps** and **App Services**.
- **Ensured alignment across the development teams and with client stakeholders**, while also mentoring junior developers and fostering a collaborative team environment.

Senior Software Engineer, Technical Advisor

Big Five Canadian Financial Institution

Personal Banking Services *(Java, Spring Boot, Azure Cloud, Redis, Oracle WebSphere)*

May 2021 - May 2023

- Developed and executed a road map for **migration of a suite of microservices from on-prem to the cloud**.
- Implemented an **anti-corruption layer** to securely migrate data from a legacy system to a **Redis** cache.
- As the subject matter expert on the on-prem to cloud migration process, **advised several teams** as they performed similar migrations.

QA Engineer, Technical Lead

Mortgage Technology Solutions

Loan Origination System *(.NET, Angular, Azure Cloud, C#, Cucumber, JavaScript, MS SQL, TypeScript)*

Mar 2020 - Apr 2021

- Utilized **Cucumber, JavaScript and TypeScript** to write automated tests of an **Angular** web application. Also performed and documented manual testing of functionality that could not be covered by automated tests.
- As a Team Lead, supported developers and QA to deliver functionality on time and according to spec.

Java Developer

Global Tier-1 Investment Bank

Foreign Exchange Trading Platform *(Java, JMS, MS SQL, Spring, TeamCity, uDeploy, Gemfire)*

Jan 2019 - Mar 2020

- Utilized **Spring** and **Tibco EMS**, an enterprise implementation of **JMS**, to implement and maintain a suite of back-end microservices.
- Participated in production support activities which involved tracing logs and code to identify and resolve defects.

Education

McMaster University

Hamilton, ON, Canada

Bachelor of Engineering, Specialized Honours in Software Engineering
